Schedule **1**
Assessment dates 1
Material release policy 2

Schedule

Technologies for Artificial Intelligence — Università degli Studi dell'Aquila First-year MSc in Computer Science, autumn 2026.

Ten lessons of three hours, every Friday from 2 October to 18 December 2026. Total: **30 hours**.

The calendar moved by one week in October: on 23 October the class worked through the consolidation notebooks (`Consolidation/`) in place of lesson 4, and lesson 4, taught on 30 October, ran over into the first three quarters of an hour of 6 November. Lesson 5 began after it and ran over in turn, filling the whole of 13 November. Every date from lesson 6 on is two weeks later than first announced, and lesson 10 moves to 18 December.

#	Date	Lesson	Materials
1	Fri 2 Oct 2026	Introduction and the machine learning workflow	`01_introduction_and_workflow`
2	Fri 9 Oct 2026	Data: exploration and preparation	`02_data_exploration_and_preparat`
3	Fri 16 Oct 2026	Regression	`03_regression`
4	Fri 30 Oct 2026, ending Fri 6 Nov	Classification and evaluation metrics	`04_classification_and_metrics`
5	Fri 6 Nov 2026, ending Fri 13 Nov	Experimental methodology and model selection	`05_experimental_methodology`
6	Fri 20 Nov 2026	k-NN, Naive Bayes and support vector machines	`06_knn_naive_bayes_svm`
7	Fri 27 Nov 2026	Trees and ensembles	`07_trees_and_ensembles`
8	Fri 4 Dec 2026	Unsupervised learning	`08_unsupervised_learning`
9	Fri 11 Dec 2026	Neural networks	`09_neural_networks`
10	Fri 18 Dec 2026	Convolutional networks and course synthesis	`10_convolutional_networks`

Assessment dates

Milestone	Date
Weekly exercises	Set at the end of each lesson, discussed at the start of the next. Exercise 4 is set on 6 November and discussed on 13 November; lesson 5 runs over to 13 November, so exercise 5 is set that day and discussed on 20 November. Nothing is collected: one of the ten is drawn at the exam and you talk through your own notebook. Exercise 10 has no lesson after it, so it is worked for the exam alone.
Exam: one of the ten exercises drawn and discussed	**Three sittings between January and February 2027.** The dates are set by the degree programme and are not yet published; this table is updated when they are.

Material release policy

Slides and notebooks are published **on the day of the lesson**. The handout, which carries the full mathematical treatment, follows **by the Monday after**, since it is study material rather than lecture support.

Students receive new material with `git pull`. The Docker image is only republished when the environment's dependencies change — see `Setup/Docker_Quickstart.md`.
