Schedule

Technologies for Artificial Intelligence — Università degli Studi dell'Aquila First-year MSc in Computer Science, autumn 2026.

Ten lessons of three hours, every Friday from 2 October to 4 December 2026. Total: **30 hours**.

#	Date	Lesson	Materials
1	Fri 2 Oct 2026	Introduction and the machine learning workflow	01_introduction_and_workflow
2	Fri 9 Oct 2026	Data: exploration and preparation	02_data_exploration_and_preparation
3	Fri 16 Oct 2026	Regression	03_regression
4	Fri 23 Oct 2026	Classification and evaluation metrics	04_classification_and_metrics
5	Fri 30 Oct 2026	Experimental methodology and model selection	05_experimental_methodology
6	Fri 6 Nov 2026	k-NN, Naive Bayes and support vector machines	06_knn_naive_bayes_svm
7	Fri 13 Nov 2026	Trees and ensembles	07_trees_and_ensembles
8	Fri 20 Nov 2026	Unsupervised learning	08_unsupervised_learning
9	Fri 27 Nov 2026	Neural networks	09_neural_networks
10	Fri 4 Dec 2026	Convolutional networks and course synthesis	10_convolutional_networks

Assessment dates

Milestone	Date
Weekly exercises	Set at the end of each lesson, discussed at the start of the next. Nothing is collected: one of the ten is drawn at the exam and you talk through your own notebook. Exercise 10 has no lesson after it, so it is worked for the exam alone.

Milestone	Date
Exam: one of the ten exercises drawn and discussed	Three sittings between January and February 2027. The dates are set by the degree programme and are not yet published; this table is updated when they are.

Material release policy

Slides and notebooks are published **on the day of the lesson**. The handout, which carries the full mathematical treatment, follows **by the Monday after**, since it is study material rather than lecture support.

Students receive new material with `git pull`. The Docker image is only republished when the environment's dependencies change — see [Setup/Docker_Quickstart.md](#).
